SUMMARY

An aspiring tech enthusiast diving deep into the world of Data and AI along with knowledge of Web development and DSA.

PROJECTS

CSV Cleaner   Link to Github

Built a full-stack web application for cleaning and formatting CSV files.
Backend: Developed REST APIs using FastAPI, handling CSV uploads, data cleaning (trimming spaces, removing duplicates, handling missing values), and returning results in CSV/XLSX format. Deployed on Render.
Frontend: Designed a responsive UI with React (hosted on Vercel) for file upload, preview, and download of cleaned datasets.
Implemented CORS configuration, streaming file responses, and integrated Excel export using Pandas + OpenPyXL.

Personal Portfolio   Link to Github

Built a modern, responsive portfolio using React (Vite) and Tailwind CSS to showcase projects and skills. Integrated EmailJS for direct contact via email.
Designed a clean, mobile-friendly UI with smooth navigation and component-based architecture.
Deployed online for easy accessibility and professional presentation.

EDUCATION

2023 - Present	BTech. at **NIT Bhopal**	(CGPA: 8.6)
2021-22	Class 12th CBSE Board	(87.8%)

SKILLS

Programming Languages	Python, JavaScript
Data	Data Cleaning (Pandas, NumPy, Scikitlearn), SQL, AzureDataStudio, Tableau
Web Developement	ReactJs, ExpressJs, MongoDB

CERTIFICATIONS

- SQL and Relational Databases 101 - powered by IBM   Certificate Link
- Data Analytics Job Simulation – Deloitte Australia

WORK EXPERIENCE

Python Developer Intern- CodeAlpha   April 2025

Gained hands-on experience with Python libraries such as NLTK for Natural Language Processing (NLP) and scikit-learn for machine learning.

Developed projects including a Stock Price Prediction tool and other predictive models, applying concepts of data preprocessing, feature engineering, and supervised learning.
